Professional Summary

Creative Information Technology student focusing on UI/UX Design, frontend development, and digital game art. Experienced in translating visual concepts into code by developing web interfaces, implementing gamification elements, and illustrating original game assets. Enthusiastic about leveraging design tools to build clean, user-centered digital experiences.

Core Skills

UI/UX & Creative Design Wireframing, User Interface Layouts, Moodboarding, Gamification Concepts, Character & Asset Illustration	Frontend Development HTML5, CSS3, JavaScript (Vanilla/ES Modules), TypeScript, React 18, Tailwind CSS (v4), Vite
Tools & Workflow Figma, Canva, Krita, Ibis Paint X, CapCut, GitHub, Jira, Adobe Photoshop & Illustrator (Basic)	Development Workflow AI-Assisted Development (Vibe Coding/Prototyping) , Firebase (Auth/Firestore)

Relevant Projects

Personal Portfolio: Art of Rain, Designer & Frontend Developer A creative web portfolio showcasing illustration portfolios, game design cards, and web layout designs. - Designed and implemented complex interaction layouts using React 18, Tailwind CSS, and Radix UI. - Utilized AI-assisted engineering workflows to implement scroll-driven previews and cinematic layout animations using GSAP and Framer Motion.	2026
MathPulse AI: Capstone Project, Design Lead & Frontend Developer An AI-powered math tutoring platform featuring adaptive learning algorithms and student progress tracking. - Co-led the design direction, creating the brand logo, custom user avatars, and website asset ecosystems using Krita. - Designed and built responsive frontend web interfaces for the student, teacher, and admin dashboards using React 18, TypeScript, and Tailwind CSS v4. - Conceptualized and engineered gamification modules, illustrating a custom "Avatar Shop" mechanics layer with multi-component clothing assets to boost student engagement.	2026
Barangay Equipment Borrowing & Tracking System, Scrum Master, UI/UX Designer & Developer A client-side multi-page web platform streamlining equipment booking and real-time inventory lifecycle tracking for Brgy. Mapulang Lupa. - Served as Group Leader and Scrum Master (F5), managing development workflows, task tracking, and agile sprints. - Architected the complete UI/UX wireframes and developed core front-end pages utilizing modular JavaScript, HTML5, and CSS3. - Integrated Firebase Authentication and Cloud Firestore to manage role-based user/admin access and live request state transitions.	2025

Gora Na Explorer (Tabletop Game & Mobile App), <i>Lead Game Artist</i> A hybrid physical tabletop and digital mobile card game ecosystem developed under Xandata Studios. • Produced and illustrated the entire visual design identity, including brand logos, character concept art, physical board maps, and card layout designs. • Designed digital environment backgrounds and asset tiles for the companion mobile game expansion app. • Utilized Krita and Ibis Paint X to deliver consistent, thematic visual assets matching target gameplay aesthetics.	2025
Project V-Serve, <i>UI/UX Designer</i> An automated, ARTA-compliant customer feedback and analytics system for the City Government of Valenzuela. • Designed the project moodboard and established the visual interface style guide for mobile, web, and standalone kiosk interfaces. • Created comprehensive UI wireframes emphasizing accessibility and frictionless navigation for citizens submitting evaluation data.	2025
Crafted By: Print Habit, <i>UI/UX Designer & Frontend Developer</i> A digital web platform and storefront client solution tailored for a keepsakes customization business. • Co-designed high-fidelity website wireframes and developed the semantic frontend user view using vanilla HTML5, CSS3, and JavaScript.	2025

Education

Bachelor of Science in Information Technology, *Pamantasan ng Lungsod ng Valenzuela (PLV)*
Expected Graduation: June 2027
